

# Instructions for obtains IP automatically

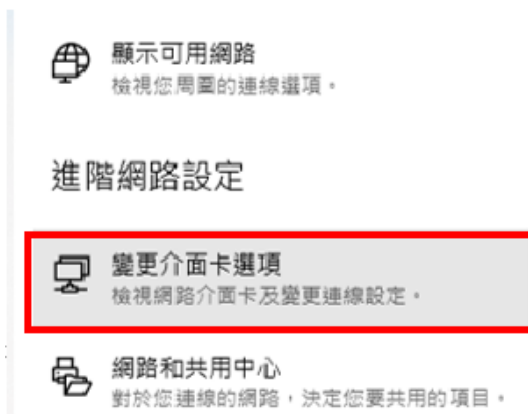

*Note: The dormitory network is a **wired network**, not to be confused with a wireless network.*

## Windows (Win10) :

- 1、 Right click the network icon in the lower right corner of the computer, and select "**Open Network & Internet Settings**".

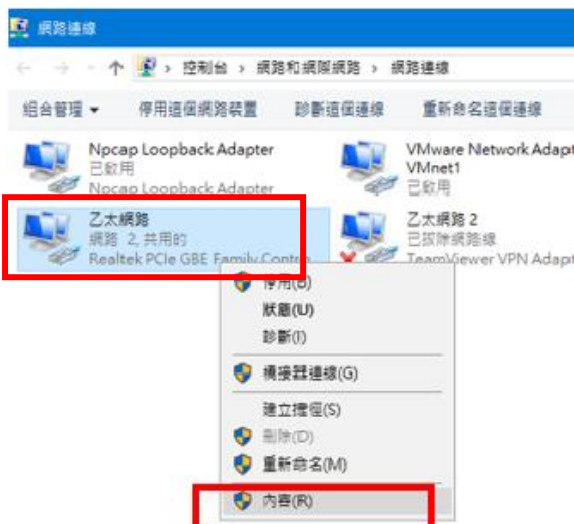

- 2、 Click "**Change adapter options**".

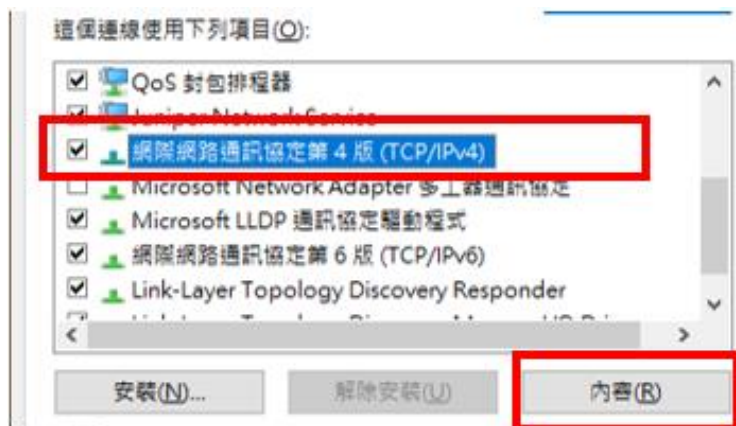

- 3、 The network cards in the computer will be listed, right click "**Ethernet**" and select "**Properties**".

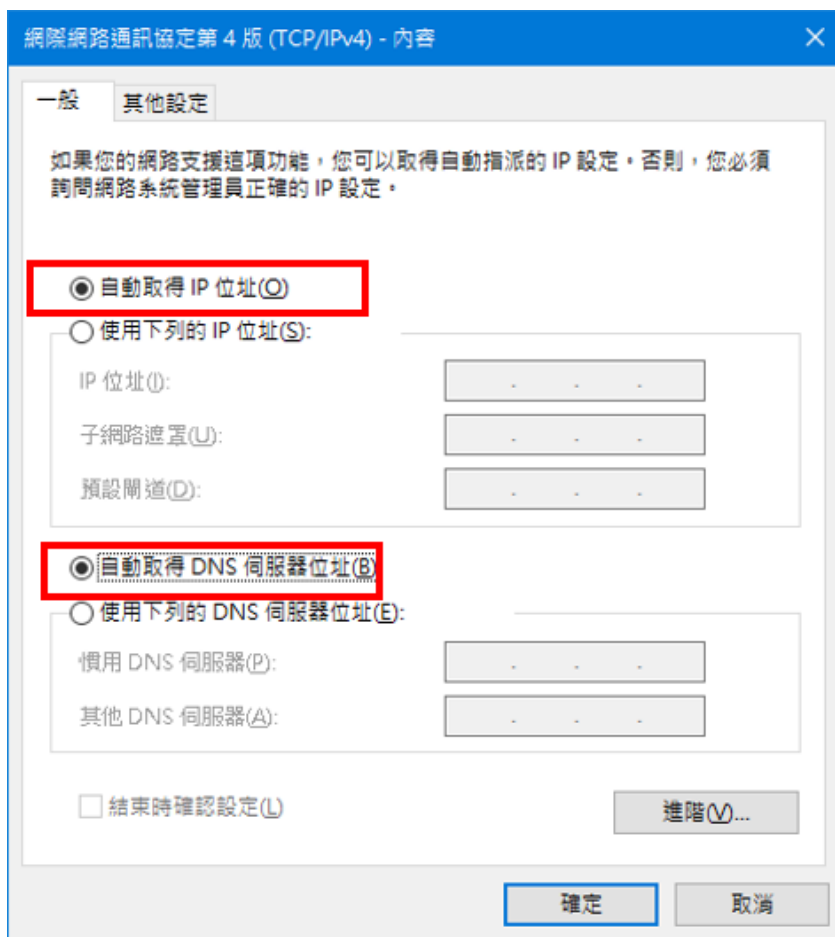

Note: Name of Win7 is "Local Area connection".

4、 Find "Internet Protocol Version 4 (TCP/IP)", and then click "Properties".

5、 Please confirm that both IP and DNS are set to "obtain automatically".

Mac :

Select "Ethernet" on the left in the "System Preferences"\ "Network", and select "Use DHCP" for "Set IP" on the right.
